

Deionizer's Performance

Benefits of our Portable Water Deionizers

- ✓ Refilling is simple
- ✓ No need to towel dry after washing
- ✓ TDS meter eliminates guessing
- ✓ Easy and fast hookup
- ✓ Standard hose connection
- ✓ Lightweight and compact
- ✓ Save time and labor
- ✓ End water spots forever

Capacity of a Water Deionizer

The total dissolved solids (TDS) of the water source will help to determine local capacity of your unit and output of our deionizer to indicate when resin change-out is necessary. This is easily accomplished with our simple-to-use meter provided with the unit. The frequency for refilling depends on the TDS of the water source, flow rate, and the gallons used per application. Deionizer water quality will vary on the type of resin, source water quality, flow, efficiency of refill, remaining capacity, temperature, etc.

Our Most Popular Model

Mixed Bed Double Standard with Bypass Head

The bypass makes it so you can easily go between deionized and non deionized water.

Size - 24" x 9.25"
Weight - 32 lbs.
Cu. Ft. - .50
Max Flow Rate - <3 gal./min.

Market Applications

Spot-free rinse

- Auto Detailers & Dealerships
- Cars, RVs, & Motorcycles
- Yachts & Cruisers
- Windows
- Solar Panels

Manufacturing

- Beverage Production
- Chrome Plating
- Powder Coat Processes

Special Applications

- Medical
- Military
- Laboratories & Distilleries

Replacement

- Distilled Water
- Reverse Osmosis Water

The On The Go® Portable Water Deionizers (DI) uses Ion Exchange Technology to remove all ionized minerals and salts. Deionization effectively removes all dissolved solids from the water resulting in laboratory grade water for many applications. Dissolved solids are the culprit for water spotting after rinsing. Our products save you time and money while being cost-effective, portable and convenient. Eliminate spotting and all the hassles and headaches!

Save Time and Money

Save Time and Money with a Portable Water Deionizer

- Cost Effective Water Purification Solution
- High Flow Rates
- Portable, Compact and Convenient
- Laboratory Grade DI Water
- Premium High Grade Deionization Resins
- Small Footprint
- Easy & Quick Replacement of Resin

Replacement Kits

DI resin refill kits are available in single and bulk packages. Buying your refill kits in bulk reduces your cost per gallon compared to single refills.

TDS Meter

A TDS Meter will tell you what the total dissolved solids are in your water (not hardness).

Deionizer Package

Includes the tank with resin, black cradle base, TDS meter, four foot hose, cap and plug, white handle, and brass/stainless/or plastic adapters.

Best Practices for our Portable Water Deionizers

- ✓ Effectiveness will be achieved by staying in the recommended flow rates of each model.
- ✓ Use a TDS Meter to test your water quality.
- ✓ If you know your TDS, we can break down the capacity and cost per gallon to determine what deionizer is right for you and your uses.
